

## PerformaLite Pallet

The PerformaLite Pallet is a light-weight, two-piece pallet with a total mass of 10,7 kg that can be used either as a distribution pallet or as a racking pallet. It possesses all the characteristics and delivers all the benefits that have made the Performa Pallet such a sought-after product, including Kaymac's three-year warranty and full FDA compliance.

The PerformaLite Pallet has two major applications:

- It is the ideal solution for customers requiring a non-returnable pallet as a distribution pallet for export where wood or the fumigation of loads is a major concern and also for those customers needing a plastic pallet where the customer controls their own distribution.
- With the runners clipped on, it is ideal for use as a rackable pallet by customers who have pallet packs of 800 kg and less to rack, and/or where HACCP compliance is required.

Pallet Size (mm)			
L	W	H	Nesting Height
1200	1000	135	52

Containerisation with Runners		
40 Foot HC	40 Foot	20 Foot
380	320	128

Pallet Loading (kg)		Pallet Weight (kg)	
Static	3000	Pallet Weight	8.5
Dynamic	1000	Pallet with Runners	10.5
Rackable	800		

Containerisation Nesting
